Dynadrill D.T.H Button Bits

Dynadrill DTH Button Bits are assembled from the highest quality components, produced to a rigidly maintained specification & subject to rigorous inspection checks through out their manufacture to ensure a dependable product, providing a consistent level of performance.

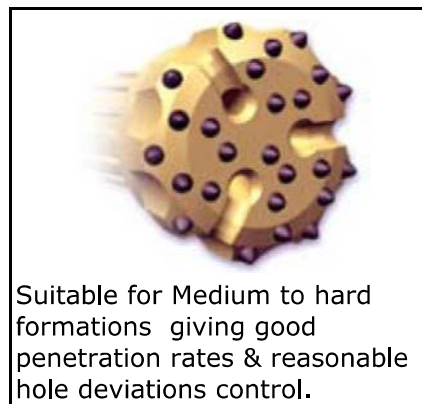

Dynadrill DTH Button Bits are produced in a wide range of sizes to suit most popular types of Down Hole Hammers.

Dynadrill DTH Button Bits are available with different head configurations to suit changing drilling conditions & rock characteristics. Bits are generally fitted with Hemispherical or Round tungsten carbide inserts but Parabolic or Ballistic inserts are available on many sizes. Alternatively, a combination of Hemispherical & Parabolic inserts can be fitted.

Carbides

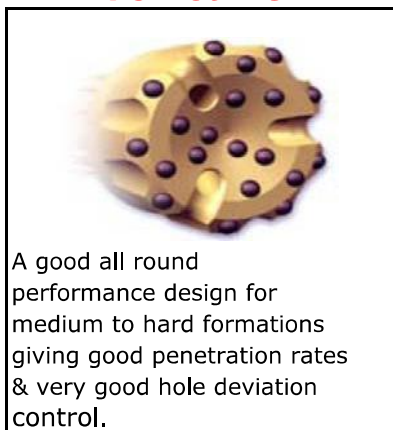

Convex

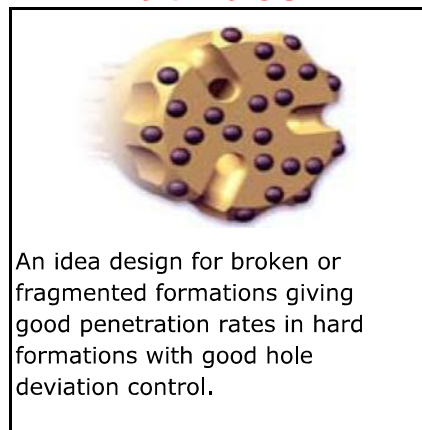

Suitable for Medium to hard formations giving good penetration rates & reasonable hole deviations control.

Concave

A good all round performance design for medium to hard formations giving good penetration rates & very good hole deviation control.

Flat Face

An idea design for broken or fragmented formations giving good penetration rates in hard formations with good hole deviation control.
